264433 *World Without Summer: A Volcano Erupts, A Creature Awakens, And The Sun Goes Out.* When Mount Tambora erupted in April 1815, it was the largest explosion in recorded history. The land around Indonesia was a hellscape of fire and smoke. In the months and years following, the fallout spread through the atmosphere. That same year, Mary Shelley fled England with poet Percy Shelley. While sheltering from the worst summer in Switzerland's history, she watched the explosive thunderstorms over Lake Geneva and caught the spark of an idea. Almost overnight, *Frankenstein* was written. il. Imamura, Yas. [IL 10-14] 304 pages Random House Studio 303 **23.98**

429278 *Hawaiian Archipelago*. Hawaii is a chain of islands that formed in the Pacific Ocean due to volcanic activity. The Pacific plate moves very slowly over a hot spot in Earth's mantle. This caused a string of islands known as an archipelago to form. Over the course of many centuries, one island would form over the hot spot, but the plate would move, allowing a new island to form. Older islands have been worn away and sink back into the ocean in time. *U.S. Seismic Zones*. il. [IL 9-12] 32 pages PowerKids 551 **18.11**

While that danger is no longer a problem, Puerto Rico and surrounding islands are prone to earthquakes and tsunamis. *U.S. Seismic Zones*. il. [IL 9-12] 32 pages PowerKids 551 **18.11**
